About USARC

USARC was created by the Arctic Research and Policy Act of 1984, (as amended, P. L. 101-609), to establish the national policy, priorities, and goals necessary to construct a federal program plan for basic and applied Arctic scientific research. USARC advises the Interagency Arctic Research Policy Committee in developing national Arctic research projects and a five-year plan to implement those projects. USARC also supports interaction with Arctic residents, international Arctic research programs and organizations, and local institutions, including regional and local governments, in order to obtain the broadest possible view of Arctic research needs. USARC is an independent federal agency, funded through NSF's appropriation, specifically as an activity in the Research and Related Activities account.

USARC is requesting \$1.524 million, \$90,500 above the FY 2018 Actual. In FY 2020, new leases will be established for both USARC offices (in Arlington, VA, and in Anchorage, AK) by the General Services Administration. The FY 2020 Request provides funds to advance Arctic research, and to recommend Arctic research policy that is consistent with the Administration's *FY 2020 Administrative Research and Development Budget Priorities* (M-18-22).

The FY 2020 Request will support three FTE funded at USARC. In addition, the FY 2020 Request supports one full-time contractor and four part-time contractors. A total of seven compensated personnel are authorized per P.L. 101-609. The seven Commissioners may also receive up to 90 days of salary per year, at the Executive Schedule Level IV.
