MEMORANDUM

TO: National Science Foundation, Division of Acquisition and Cooperative Support
National Science Foundation Acquisition Workforce

FROM: Patrick K. Breen
Senior Procurement Executive

SUBJECT: FAR Class Deviation for FAR Part 53 in Support of Executive Order 14275 on
Restoring Common Sense to Federal Procurement

PURPOSE: This memorandum approves a class deviation to Federal Acquisition Regulation (FAR) part 53 for purposes of implementing the Federal Acquisition Regulatory Council's (the Council's) model deviation text to FAR Part 53.

BACKGROUND: On April 15, 2025, [Executive Order \(E.O.\) 14275 on Restoring Common Sense to Federal Procurement](#) was signed. Section 2 of the E.O. establishes the policy that the FAR "should only contain provisions required by statute or essential to sound procurement, and any FAR provisions that do not advance these objectives should be removed."

The FAR is being updated to:

- Remove language that is not required by statute
- Remove duplicative or outdated language
- Clarify or provide more plain language
- Align with the new FAR framework
- Preserve essential governmentwide acquisition standards

This project is referred to as the Revolutionary FAR Overhaul (RFO) initiative. This initiative will focus on core procurement requirements.

SUMMARY OF CHANGES: FAR part 53, Forms, has been streamlined and modernized. Most significantly, rather than maintaining a list of forms within the part text, it directs users to a centralized site (<https://acquisition.gov/FARforms>) as the authoritative repository for all acquisition related forms. As a result, this part no longer needs to be amended through the formal rulemaking process every time a form is updated, added, or removed. This drastically reduces the administrative burden on the FAR Council and increases the government's agility in managing its library of forms. The "Forms List" referenced in the new 53.101(b) now

performs the prescriptive function previously handled throughout this entire subpart, shifting the FAR's role from a static, self-contained text to a dynamic system that points to live, authoritative resources.

Readers should reference the table at <https://acquisition.gov/FARforms> to review retained forms and their citations for prescribed use throughout the FAR. The clause 52.253-1, Computer Generated Forms, is retained and updated. The update deletes a reference to the FAR prescriptions, in paragraph (a). This part does not directly implement any statutory requirements.

INSTRUCTIONS: The NSF acquisition workforce shall follow the RFO part 53 model and corresponding 52 model deviation text instead of FAR parts 53 and 52 as codified by 48 CFR Chapter 1. The Council's RFO part 53 model deviation text is available at [Acquisition.gov/far-overhaul](https://acquisition.gov/far-overhaul), and is incorporated into this class deviation.

For new solicitations or contracts, when using any provisions or clauses that have been revised, utilize the RFO model deviation language at RFO FAR part 52.

For open solicitations or awarded contracts, the contracting officer has discretion regarding the need to enforce or amend the provisions or clauses. Note that without some of the removed provisions or clauses, the contracting officer may be required to separately address certain aspects in the contract.

Contracting activities must review templates and related standard operating procedures to align with this class deviation and remove unnecessary processes and steps.

APPLICABILITY: This class deviation applies to all NSF procurement actions.

AUTHORITY: This class deviation is issued under the authority of EO 14275, [OMB Memo M-25-26](#), 48 CFR 1.4, and RFO FAR 1.304.

EFFECTIVE DATE: This deviation is effective as dated and shall remain in effect until it is incorporated into the FAR, or until this class deviation is rescinded, extended, or amended.

POINT OF CONTACT: Contact Raymond McCollum at 703-292-4225 or rmccollu@nsf.gov .
