## ***GRFP Reference Writing Tips***

### **PROVIDE**

Provide details that can aid reviewers in evaluating the application using the NSF Merit Review Criteria. Describe how the applicant stands out from the crowd.

### **ASSESS**

Assess the applicant's potential for significant achievements in STEM in graduate school and beyond. Support and elaborate upon other components of the application.

### **COMPARE**

Compare the relative placement of the applicant among peers (without naming other students), including GRF applicants and fellowship recipients.

### **EXPLAIN**

Explain the nature of your relationship with the applicant. *If you are a graduate advisor, it is especially important to identify yourself as such.*

## **Remember that reviewers evaluate applications based on the NSF Merit Review Criteria: Intellectual Merit and Broader Impacts**

- Reviewers are instructed to use a comprehensive, holistic approach in their review and take a balanced consideration of all components of the application
- Reference letters are a key component of a strong application package and provide another opportunity to demonstrate an applicant's potential for significant achievements in STEM!

**Evidence of potential and ability:**

- Demonstrates intellectual ability (grades, curricula, awards, publications, presentations, etc.)
- Shows engagement in leadership, outreach, and service activities
- Works as a member of a team as well as independently
- Plans, conducts, interprets and communicates research
- Takes initiative, solves problems, persists
- Displays potential to advance knowledge in the chosen field(s) of study

**Societal benefits may include, but are not limited to:**

- Full participation of the full spectrum of diverse talent in STEM
- Improved STEM education and educator development at any level
- Increased public scientific literacy and public engagement with science and technology
- Improved well-being of individuals in society
- Development of a diverse, globally competitive STEM workforce
- Increased partnerships between academia, industry, and others
- Improved national security
