

NSF Growing Research Access for Nationally Transformative Economic Development (NSF GRANTED)

U.S. National Science Foundation

NSF GRANTED creates opportunities for national transformation of the research enterprise by supporting innovative models of administrative and STEM training infrastructure that promote sustainable research capacity in U.S. institutions and organizations.

NSF GRANTED Themes:

Innovating and enhancing practices and processes within the research enterprise.

Developing and strengthening human capital within the research enterprise workforce.

Translating effective research enterprise practices into a broad range of organizational contexts.

NSF GRANTED Investments:

- ✔ **Generate** scalable models that improve research capacity and competitiveness.
- ✔ **Create** collaborations, partnerships, and communities centered around strengthening the Nation's research enterprise.
- ✔ **Increase** the range of project leadership, organizations, ideas, and approaches that NSF funds, especially related to developing areas aligned with agency priorities.
- ✔ **Strengthen** engagement across the Nation's research enterprise.
