

# NSF GRANTED

U.S. National Science Foundation

GRANTED creates opportunities for national transformation of the research enterprise by supporting innovative models of administrative and STEM training infrastructure that promote sustainable research capacity in U.S. institutions and organizations.

## GRANTED Themes:

**Enhancing** practices and processes within the research enterprise.

**Developing and strengthening** human capital within the research enterprise workforce.

**Translating** effective research enterprise practices into a range of institutional, organizing, and professional partnerships.

## GRANTED Funding Will:

- ✓ **Advance** transformation of the national research enterprise.
- ✓ **Generate** scalable models that mitigate structural barriers and expand research capacity and competitiveness.
- ✓ **Create** new and authentic collaborations, partnerships, and communities centered around strengthening the Nation's research enterprise.
- ✓ **Increase** the range of project leadership, institutions, ideas, and approaches that NSF funds.
