*James L. Moore III, Assistant Director, Directorate for STEM Education (EDU)*

*National Science Board – Open Plenary*

*November 29, 2023*

# Directorate for STEM Education Mission

Develop a **well-informed citizenry** and a **diverse and well-prepared workforce** of scientists, technicians, engineers, mathematicians and STEM educators.

EDU supports excellence in STEM education at ***all*** levels and settings.

**Office of the  
Assistant Director  
(OAD)**

# The Grand Challenges in STEM

**How do we ensure equitable access?**

**How do we recruit, prepare, and retain students?**

**How do we improve learning outcomes and participation?**

**How do we build capacity?**

# Ensuring Equitable Access to STEM

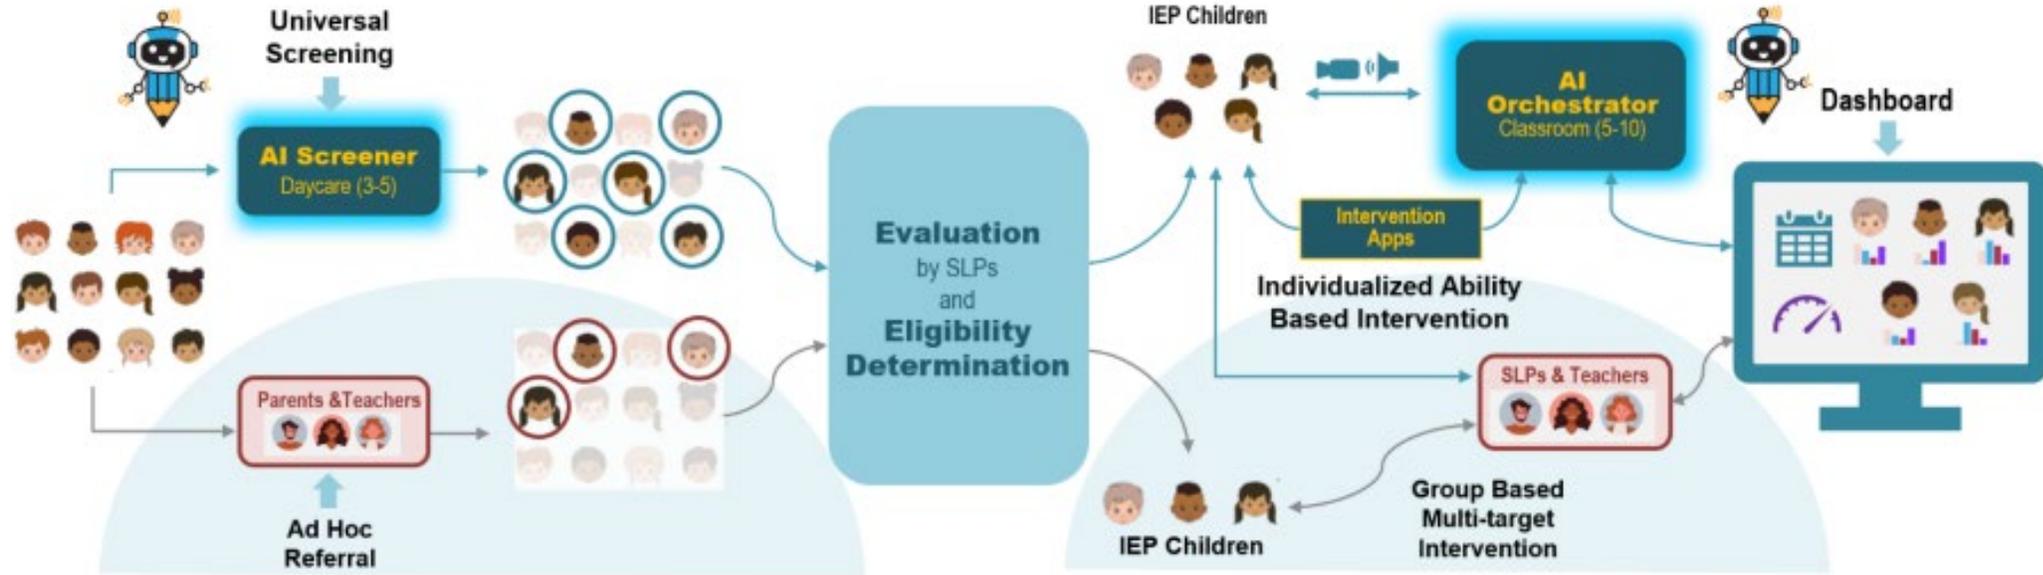

- EDU funded the project “Cultivating Research and Equity for Sign-related technology” (CREST).
- CREST provides new opportunities for deaf students and researchers to grow their professional networks. It increases visibility. It offers new pedagogy to improve experience of deaf individuals.

# Ensuring Equitable Access to STEM

National AI Institute for Exceptional Education

AI INSTITUTE  
FOR EXCEPTIONAL  
EDUCATION

Advance **use-inspired** artificial intelligence (AI) technologies to **scale** the availability of SLPs for **universal screening** and **individualized ability-based** interventions

# Supporting Recruitment, Preparation, and Retention

## Scholarships in STEM (S-STEM)

- Academically talented low-income students
- ~100,000 scholars since 2004
- 644 active awards
- 209 at MSIs
- 138 in EPSCOR states

# Supporting Recruitment, Preparation, and Retention

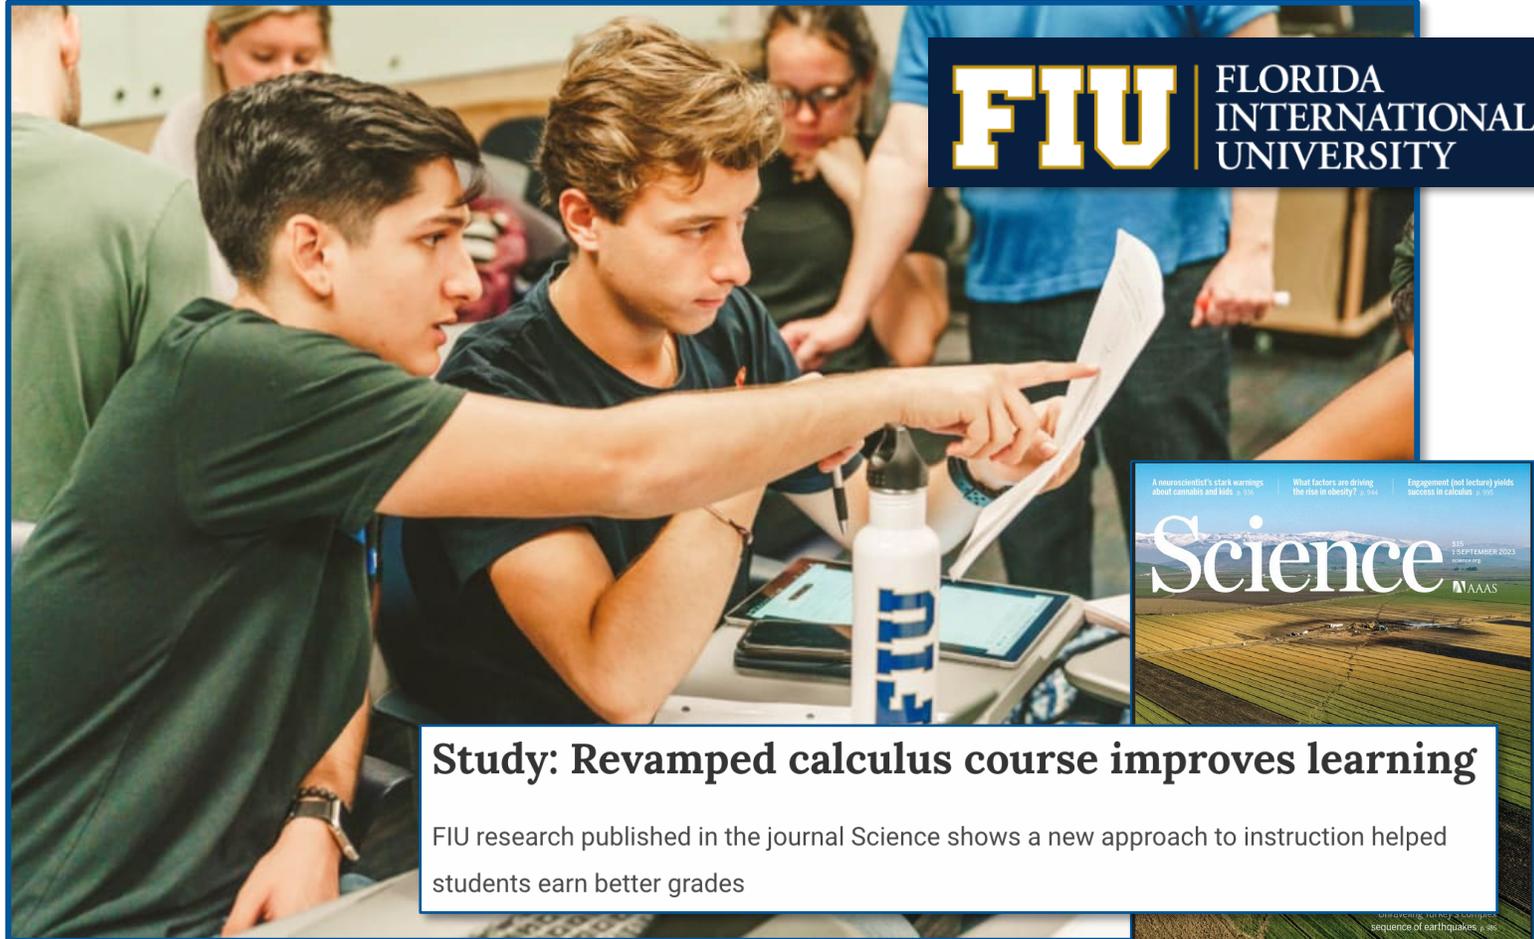

"GRFP is providing me the opportunity not only to pursue graduate education to deepen my area of study but also to dedicate a life toward increasing representation and engagement in my field."

*Andre Green, fourth from left, 2023 GRFP recipient.*

# Improving STEM Learning Outcomes

**FIU** FLORIDA INTERNATIONAL UNIVERSITY

## Study: Revamped calculus course improves learning

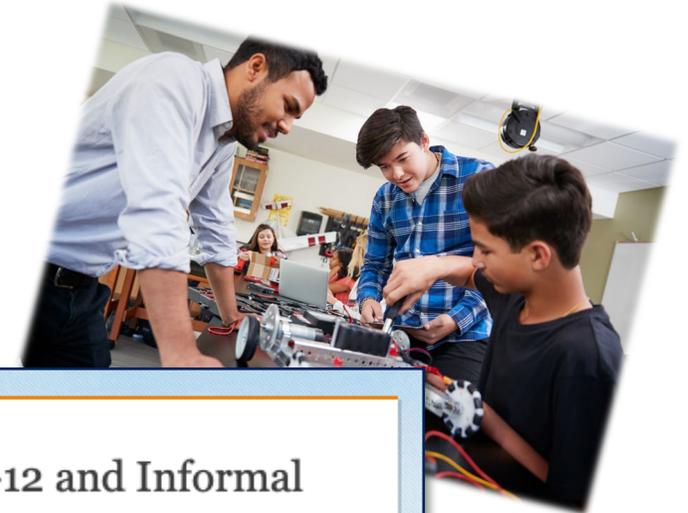

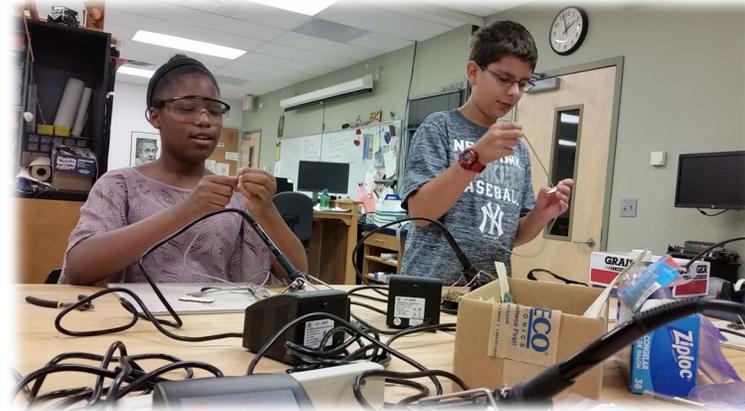

FIU research published in the journal Science shows a new approach to instruction helped students earn better grades

- EDU-funded researchers found that active learning leads to better grades and understanding of calculus compared to lecture-based classes.
- Improved teaching methods help graduate more STEM professionals.

## Dear Colleague Letter: Supporting Knowledge Mobilization for PreK-12 and Informal STEM Learning and Teaching

March 31, 2023

Dear Colleagues:

The National Science Foundation (NSF) supports collaborations and partnerships among education researchers and practitioners to advance science, technology, engineering and mathematics (STEM) education for all Americans. Such collaborations address pressing needs in the Nation's diverse preK-12 schools, including students, teachers, and families, as well as informal learning institutions where professional educators, youth, and their families are engaged (e.g., science museums, media, and community organizations). Recent findings and recommendations by [National Academies of Science, Engineering, and Medicine](#) have highlighted the benefits of mobilizing relevant knowledge between the education research and practice communities.

knowledge between the education research and practice communities. Recent findings and recommendations by [National Academies of Science, Engineering, and Medicine](#) have highlighted the benefits of mobilizing relevant knowledge, as well as informal learning institutions where professional educators, youth, and their families are engaged (e.g., science museums, media, and community organizations) (STEM) education for all Americans. Such collaborations address pressing needs in the Nation's diverse preK-12 schools, including students, teachers, and

# Building Institutional Capacity

- NRT's nearly \$63 million investment reaches 45 states, the District of Columbia and the U.S. Virgin Islands.

*Above: NRT researchers at University of Hawaii; project "Data in Engineering and Society: Converging Applications, Research, and Training Enhancements for Students"*

# Building Institutional Capacity at MSIs

Builds on the assets of the country's two-year colleges and invests in their futures.

Improves research support and service capacity at emerging research institutions.
