National Science Foundation
Office of the Director

James Wade
Office of Federal Procurement Policy
Office of Management and Budget
Executive Office of the President
725 17th Street, NW
Washington, D.C. 20503

Dear Mr. Wade:

In accordance with the Federal Activities Inventory Reform (FAIR) Act (P.L. 105-270), the
FY 2023 Commercial Activities Inventory for the National Science Foundation (NSF) is attached.

NSF has developed a strategic approach to workforce planning and deployment that evaluates mission
needs, customer expectations, and workload. The approach also identifies competencies and develops
strategies to obtain, develop, and retain critical competencies. Results from the business analysis effort
have led to the development of a competency-based Job Family framework for evaluating the
Foundation's human capital needs. Following discussions with OMB and OPM, NSF first utilized the
framework while developing the 2004 FAIR Act Inventory, and it continues to be utilized for the annual
inventory.

NSF's 2023 FAIR Act Inventory continues its use of Reason Code A to identify those commercial
activities that are core to the agency's mission and therefore are not appropriate for private sector
performance. The 2023 justification for the use of Reason Code A remains largely unchanged from
previous years.

NSF will continue to refine our inventory and evaluate the viability of competitive sourcing as a tool to
ensure that business process efficiencies are maximized at NSF. We appreciate OMB's ongoing support
of our efforts to maintain an agile workforce.

Please contact Bill Malyszka, Division Director of Human Resource Management, at
703-292-7142 for further information.

Sincerely,

Dr. Karen A. Marrongelle
Chief Operating Officer

Enclosures

JUSTIFICATION FOR EXEMPTED COMMERCIAL ACTIVITIES

Justification Statement for Reason Code A

Efficient achievement of the Foundation's mission requires a collaborative effort among a variety of staff including scientists, engineers, program assistants, administrative personnel and support staff. The interaction between Directorate staff and Universities is critical to the announcement, receipt, processing, review, decision and oversight of grants. The relationship of program staff with program directors and senior officials within the Directorates is vital because of the broad responsibilities and relatively small size of the program staff. The need for program continuity, recognition of program priorities and continuous interaction with the research community is core to the Foundation's mission, and make program staff integral to the Foundation's success. Loss of the continuity afforded by the in-house performance of the functions listed below would result in substantial risk to the Foundation's ability to accomplish its unique mission. Therefore, the following functions, although potentially commercial in nature, should not be subject to privatization, commercialization or potential outsourcing:

C315   Financial Management (10 FTE)
D300   Statistical Analysis (30 FTE)
D707   Program Evaluation (197 FTE)
D000   Regulatory and Program Management Administrative Support (31 FTE)
L000   Grants Management Administrative Support (161 FTE)

_____
Dr. Karen A. Marrongelle
Chief Operating Officer
